(678) 978-9523 | jmoon0830@gmail.com | Suwanee, GA 30024
linkedin.com/in/justin-moon | Github.com/jmoon0830

A self-driven, detail-oriented Data Analyst with a degree in supply chain management and operations and passion for data analytics. Ability to provide meaningful insights through data science, analytics, and visualization. Key strengths lie in communication between peers when brainstorming and creating thoughtful, organized visualizations to present findings. Well-versed in being able to collaborate and cooperate with new teams quickly as well as giving presentations and story-tell.

TECHNICAL SKILLS

Tools: Microsoft Excel, VBA, Python, Pandas, NumPy, SQL, JSON, HTML/CSS, Beautiful Soup, JavaScript, D3.js, Plotly, Leaflet, R, Tableau, Machine Learning, GitHub, Big Data, Statistics

Databases: MongoDB, Postgresql

Other: Flask, Git, Command Line

PROJECTS | RELEVANT EXPERIENCE

Yelp Data Scraping | 2020

A machine learning project that focused on using sentiment analysis to create word cloud visualizations for a searched place. The model would be created from historical yelp data and be able to distinguish any newly scraped review between positive or negative. The word clouds would be created based on the frequency of words that existed in each cloud.

Key tools: Python, Beautiful Soup, Sklearn, HTML/CSS/Bootstrap, JavaScript (Leaflet, ChartJS, D3), Flask, Heroku.

GitHub Repository: <https://github.com/jmoon0830/yelp-ml>

Mental Health in the Workplace Visualized | 2020

Kaggle datasets from 2014 and 2016 were used to visualize and analyze poll data about people's perception on mental health in the workplace. The project focused on analyzing the level of awareness surrounding the importance of mental health as well as people's comfortability and safety talking about the issue with their peers or supervisors.

Key tools: Python, Flask, SQL, Javascript (Plotly, ChartJS, D3), HTML/CSS/Bootstrap.

Pandemic Stock Market Sector Analysis | 2020

This project's intent was to analyze stock data during the pandemic to see which market sector had grown the most. AlphaVantage provided data that was used to create a linear regression model based on historical data to predict the likely increase for the first six months of 2020. Comparing each sector's actual growth to the predicted growth, the team was able to determine which sectors had grown higher or lower than normal.

Key tools: Python (Jupyter Notebook)

GitHub Repository: <https://github.com/jmoon0830/pandemic-stock-analysis>
